

Emma Schreifels

my design bookshelf

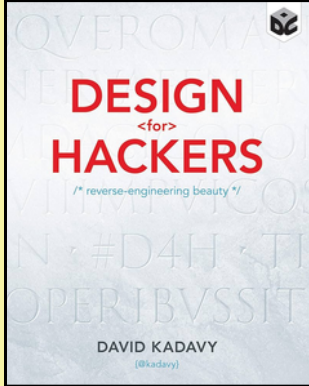

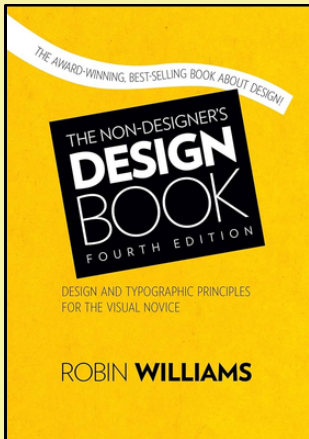

What's been on my bookshelf as a creative,
designer, and UX Engineer?

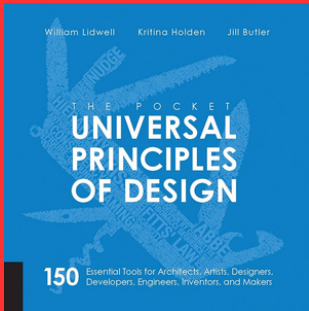

starters

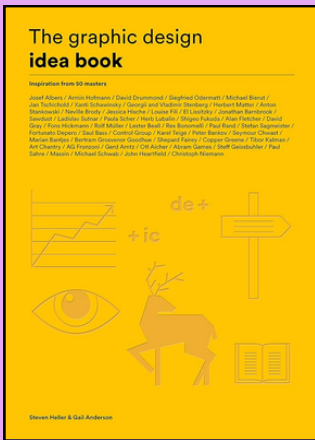

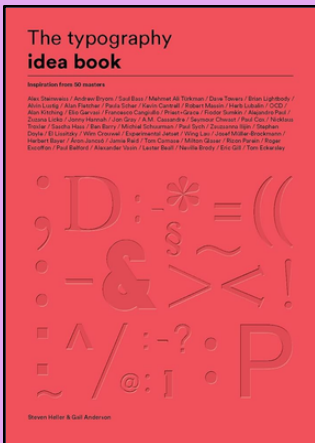

design

psychology

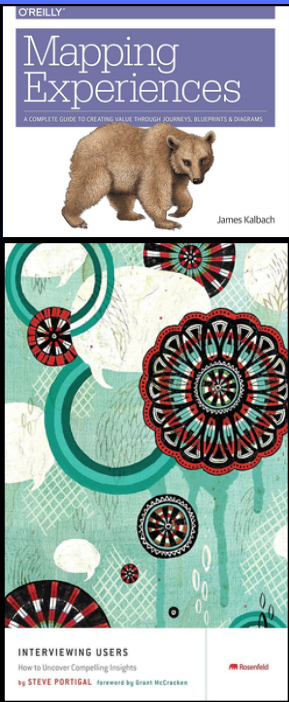

inspo

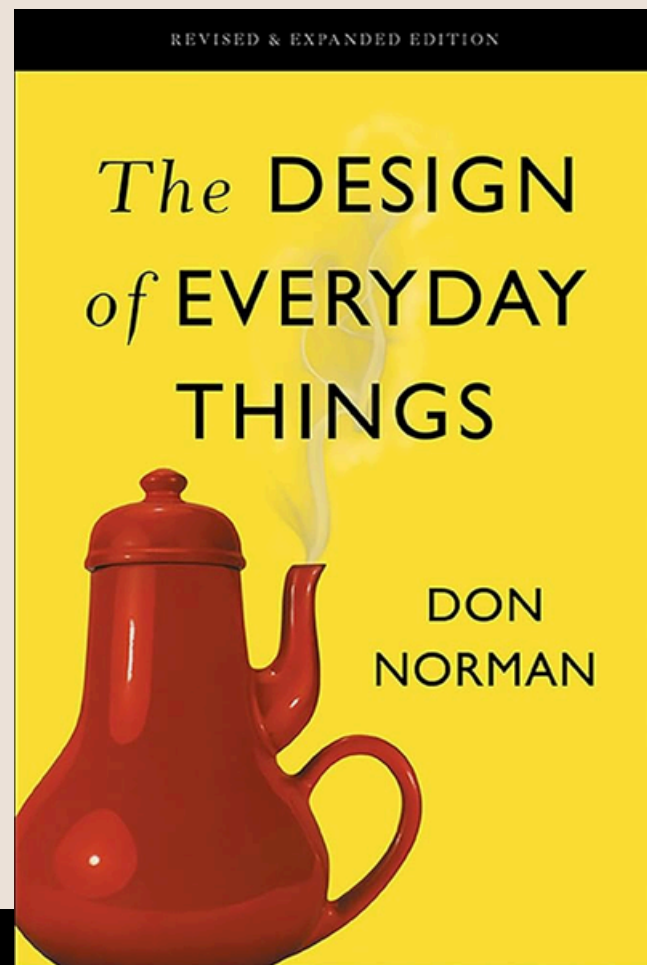

colors

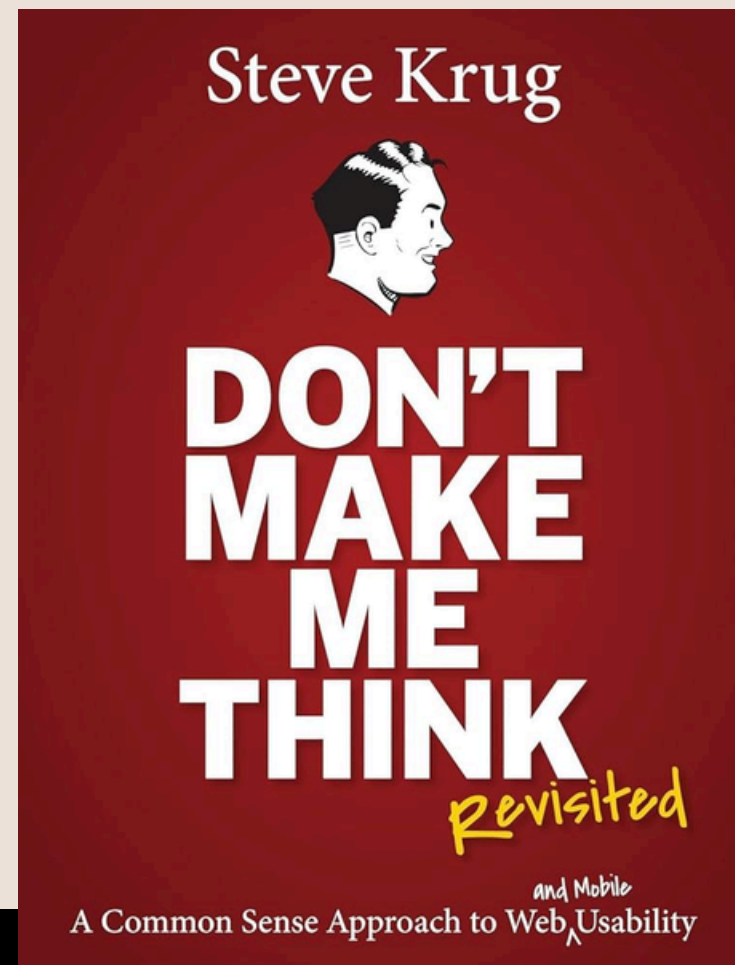

by need

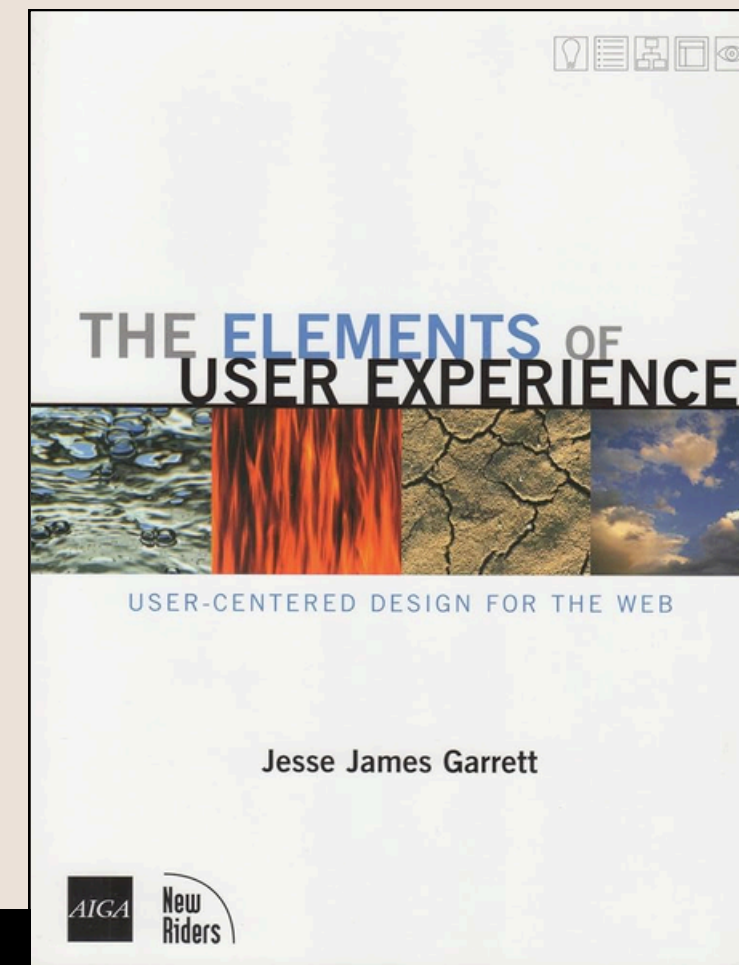

starters

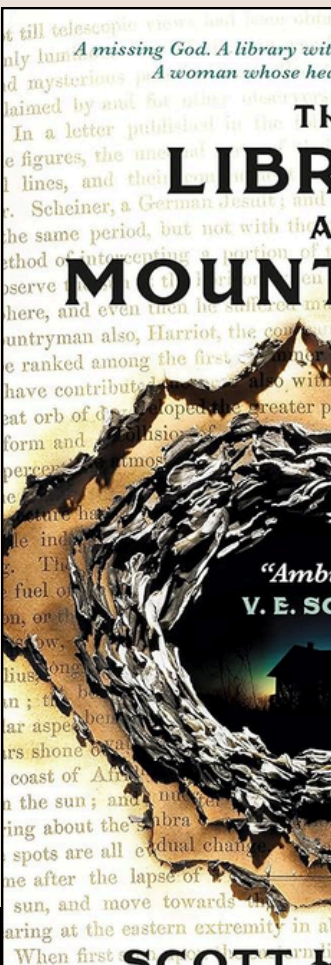

the intro to noticing
design more, most
referenced socially

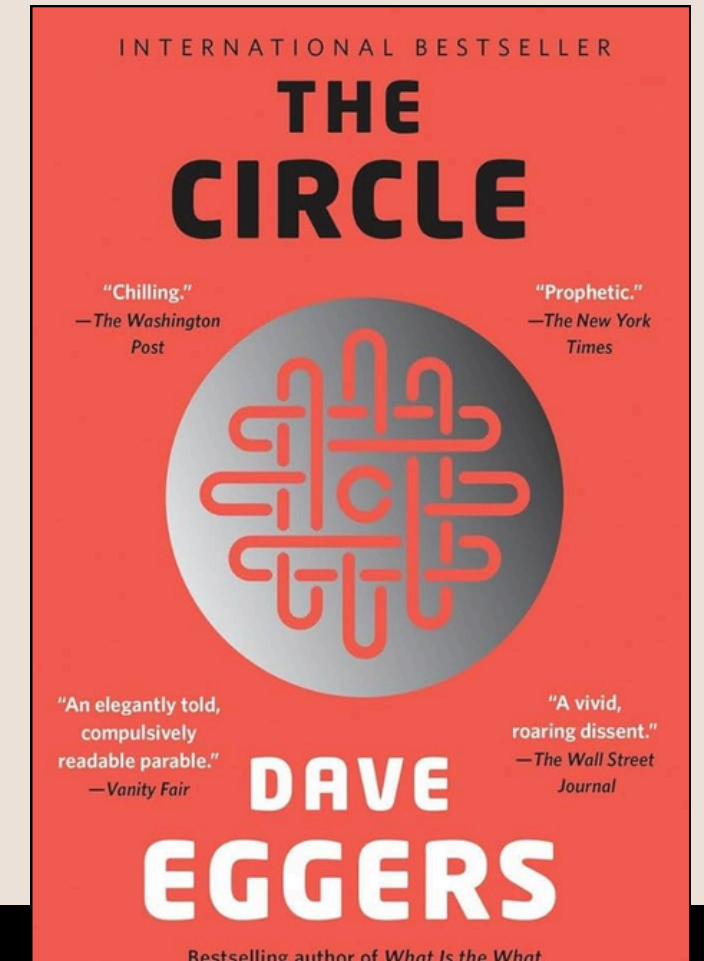

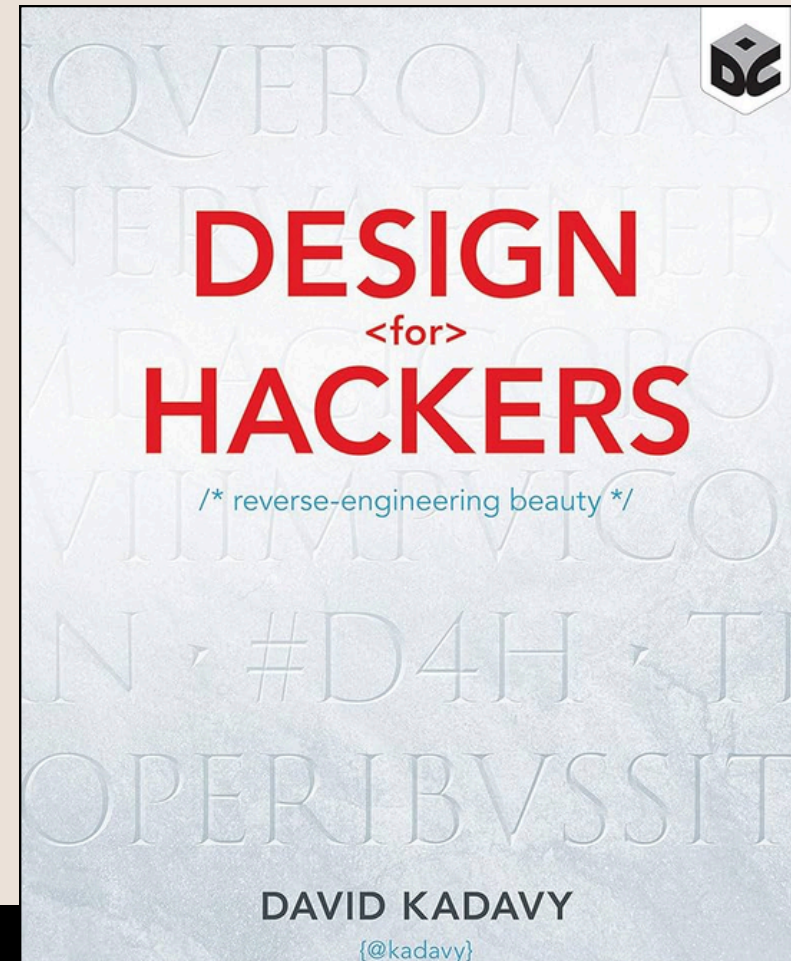

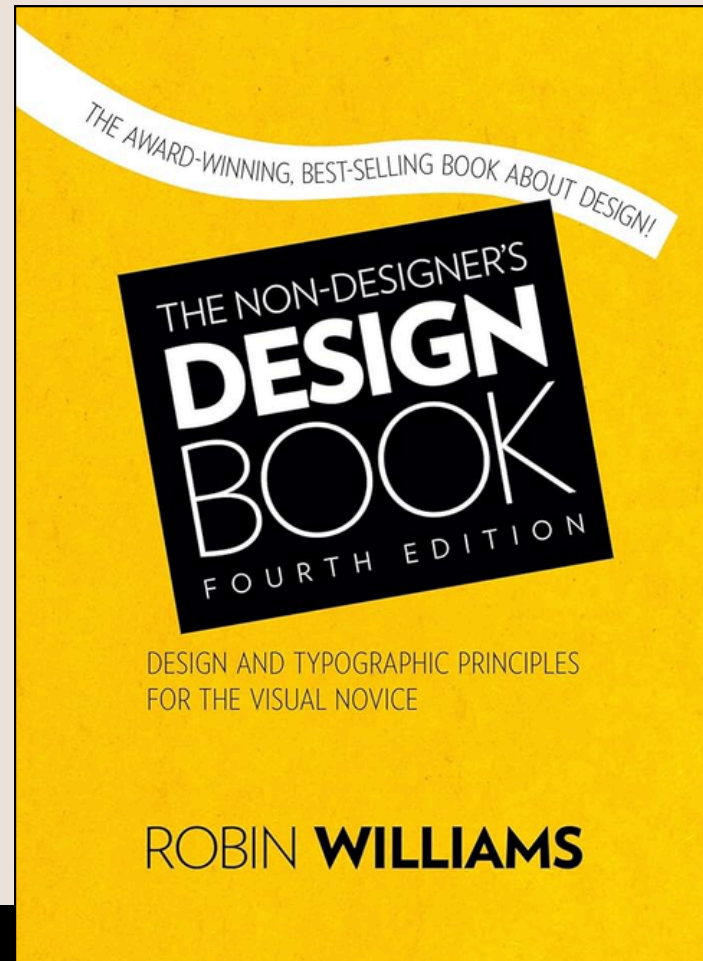

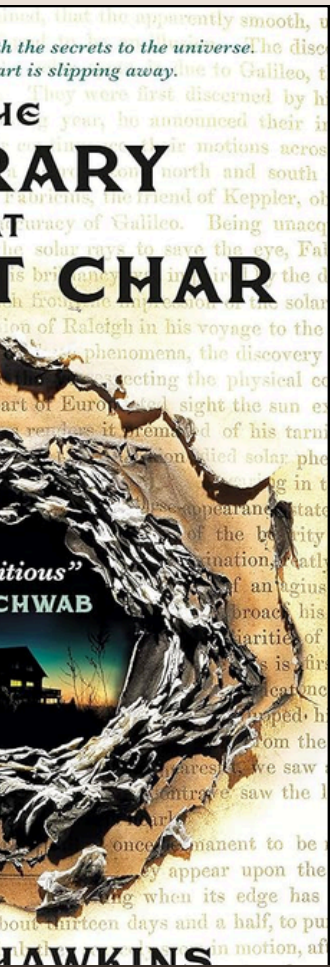

assigned in a web
design class, 1st
exposure to UX,
lend out often

may seem like
basic stuff but truly
foundational

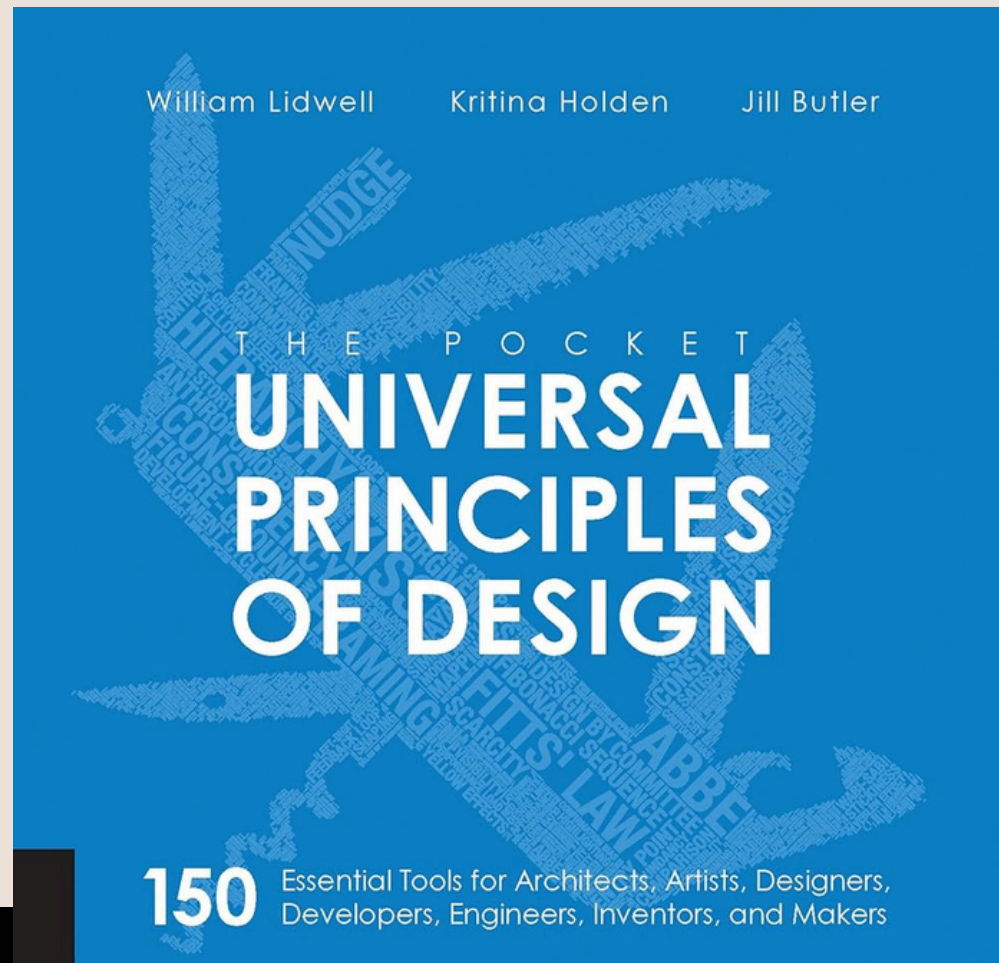

design

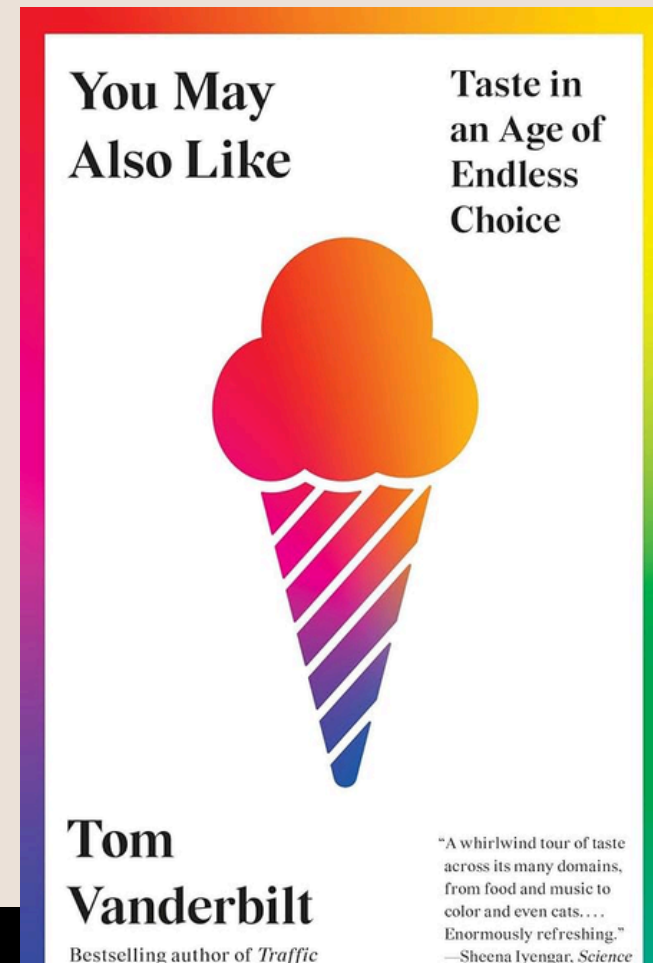

talks about contrast,
repetition, alignment,
proximity with
examples, basics +
vocabulary

color theory,
typography, and
proportion via lots of
examples

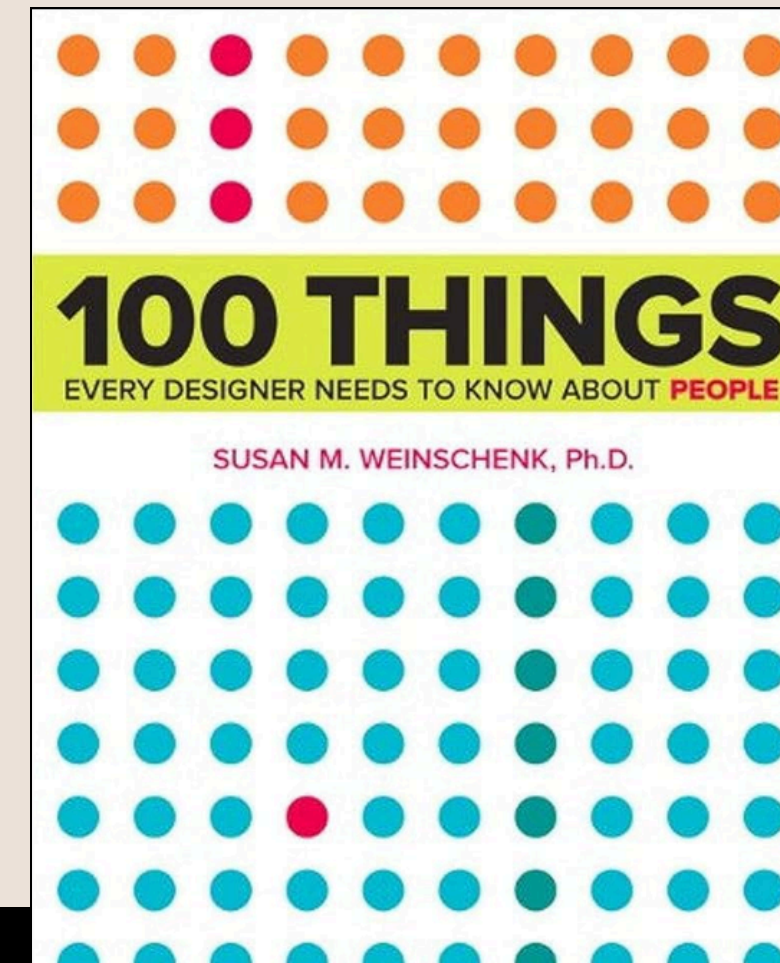

psychology

mini book on lots of
cross-disciplinary
things, helpful
illustrations

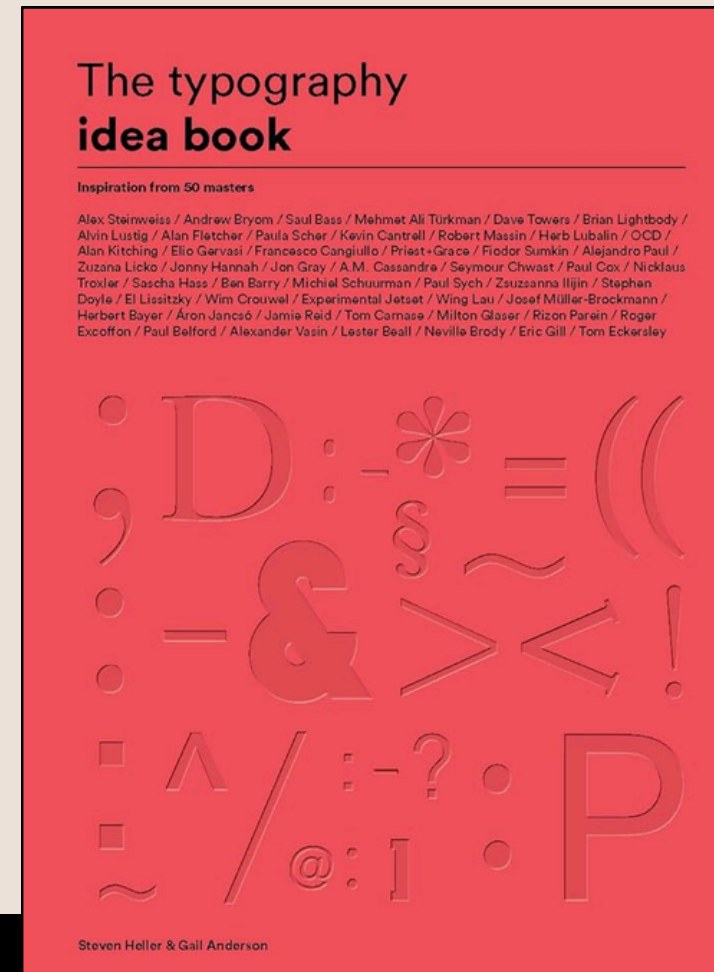

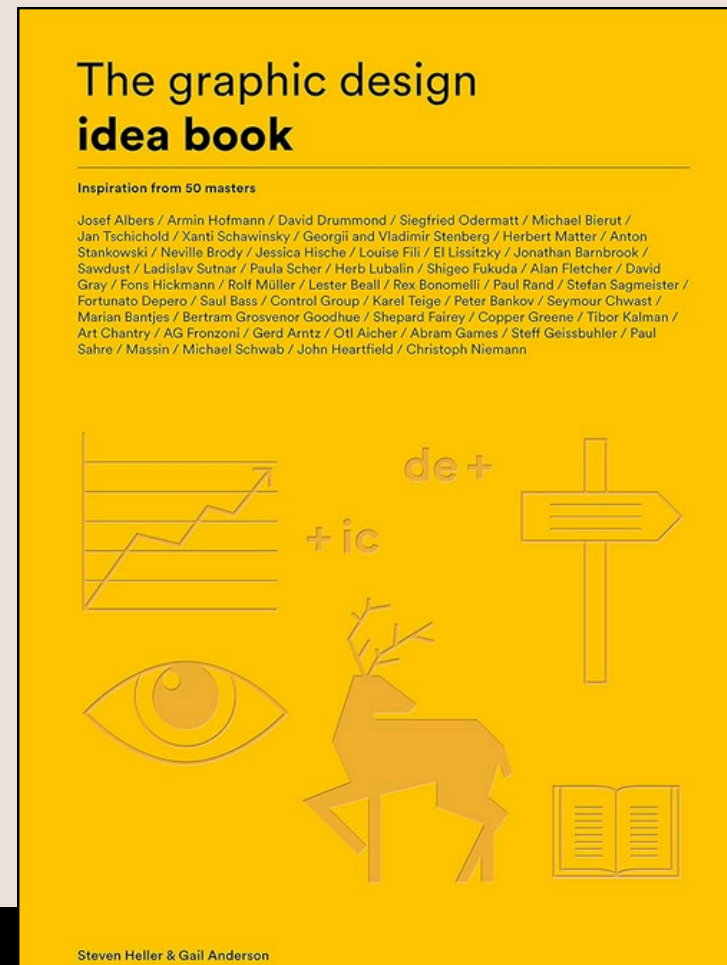

explores the
psychology of how our
environment influences
what we like

research-based
principles on how
people see,
remember, think, feel

inspo

analyzing 50
designs to inspire
creativity (inspo,
not skills)

a curated collection
of 50 innovative
typography
examples

Target's history of
design collabs
starting in 1999, re:
UX redesign of
pharmacy labels

inspo

colors

categorizes 1,500
historical & modern
patterns by type like
Floral, Geometric,
Abstract

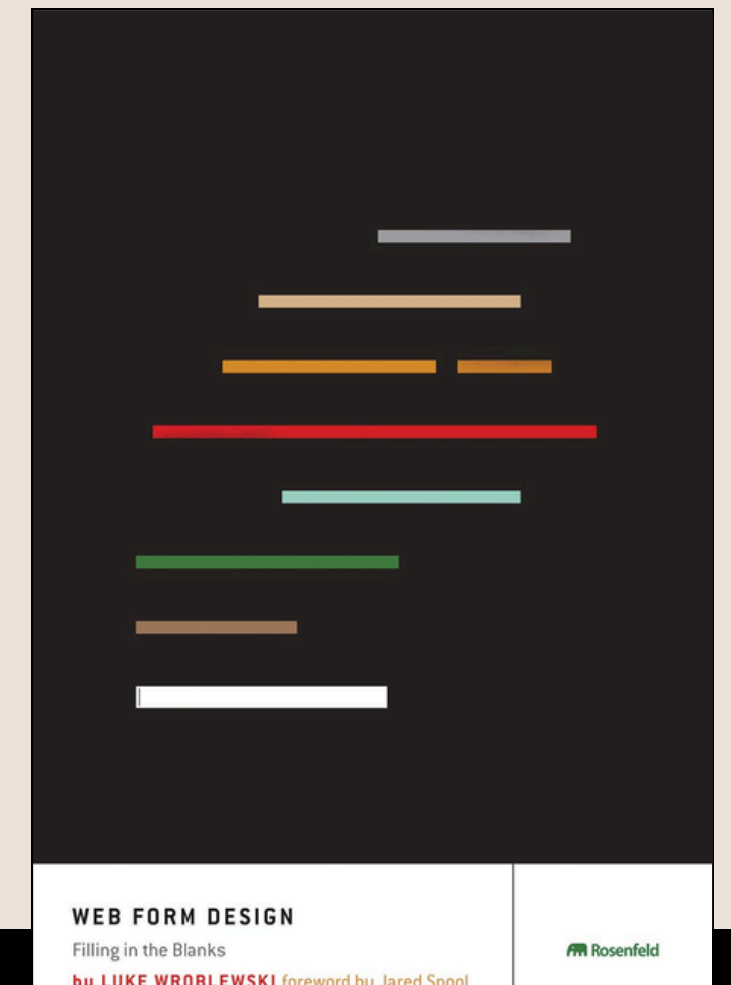

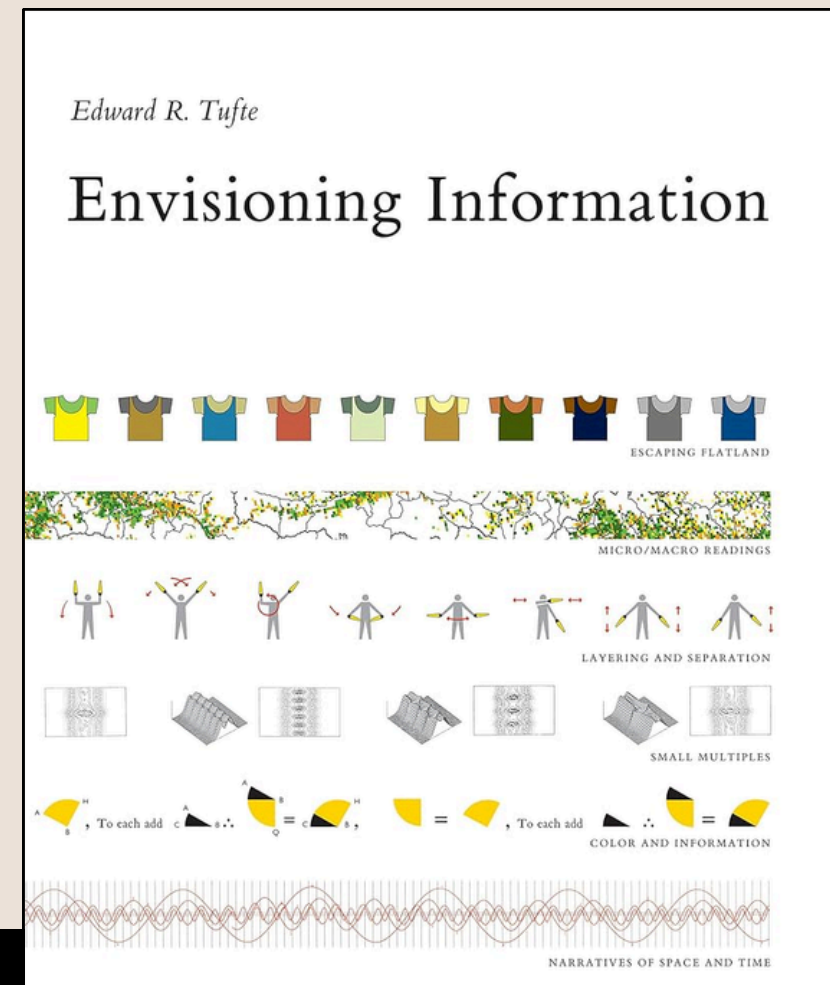

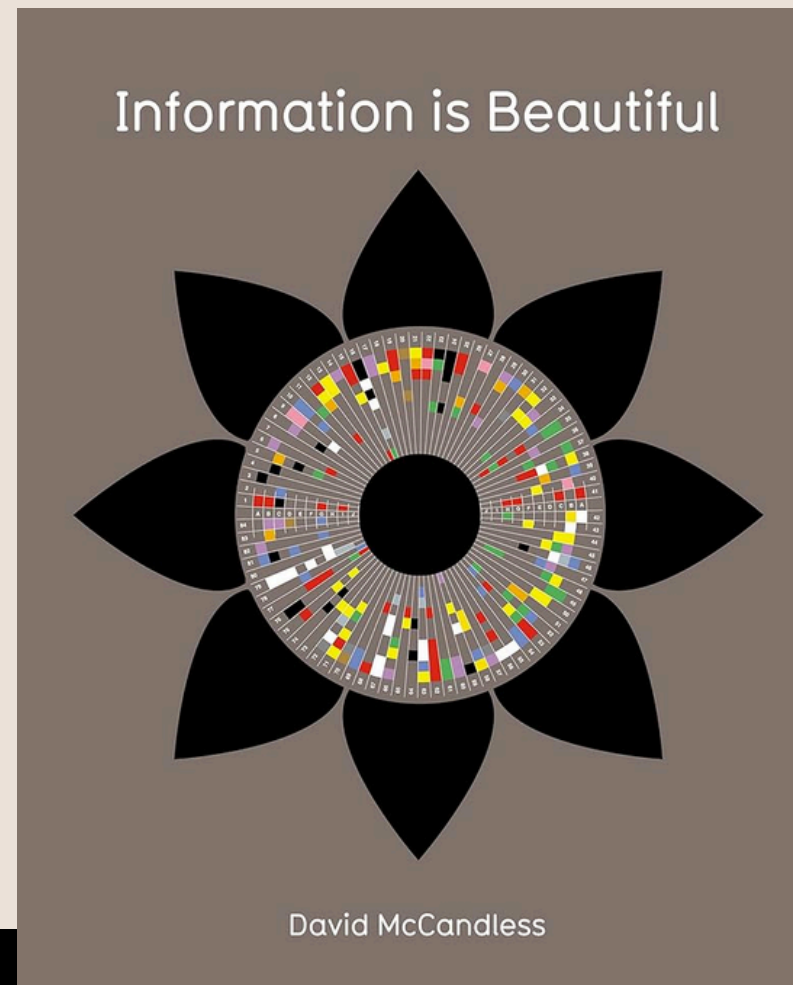

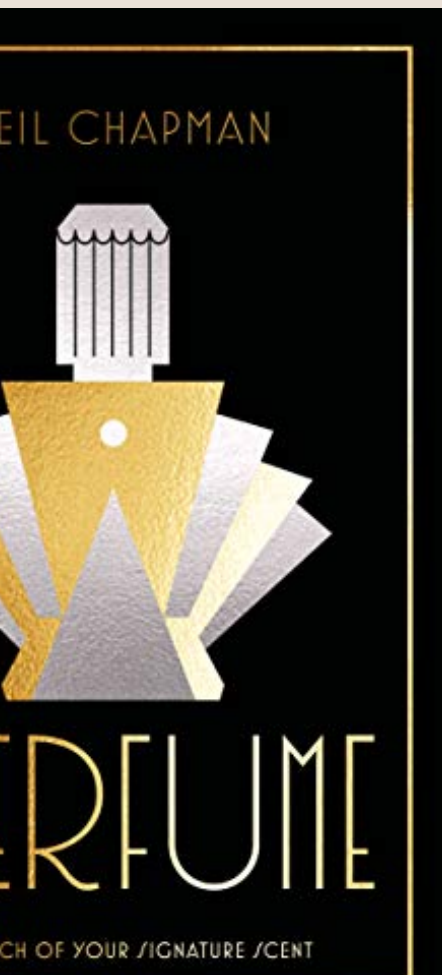

pocket-sized guide
featuring 348
harmonious color
palettes, 2-4 colors

100 years of color
palette trends,
historical via
Pantone

by need

examples of various
ways to visualize
complex & dense
information, fun

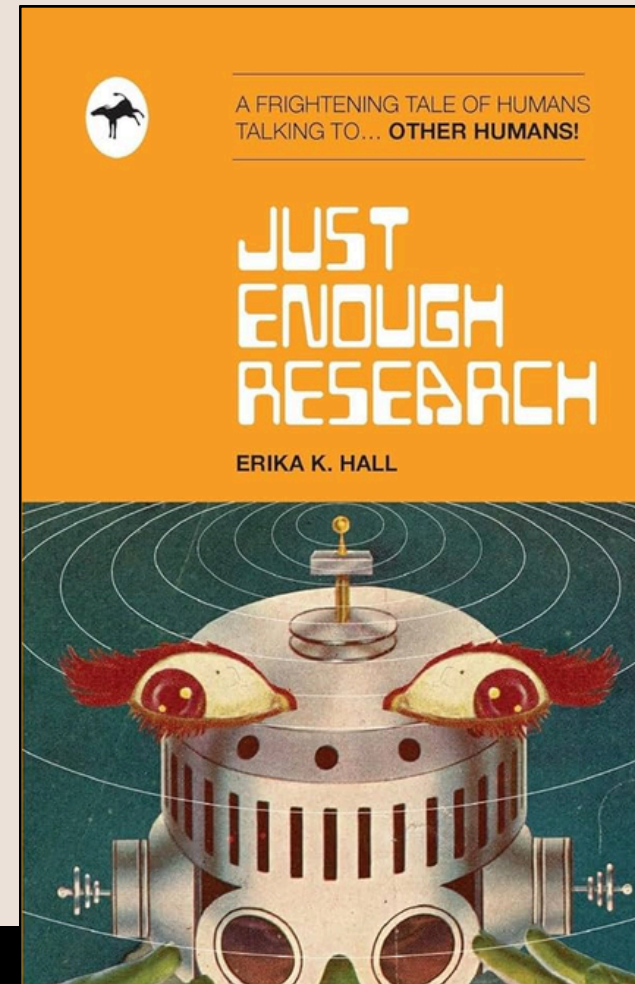

UX focus of
visualizing
information in 2D
space, educational

literally a whole
book on designing
forms with
examples

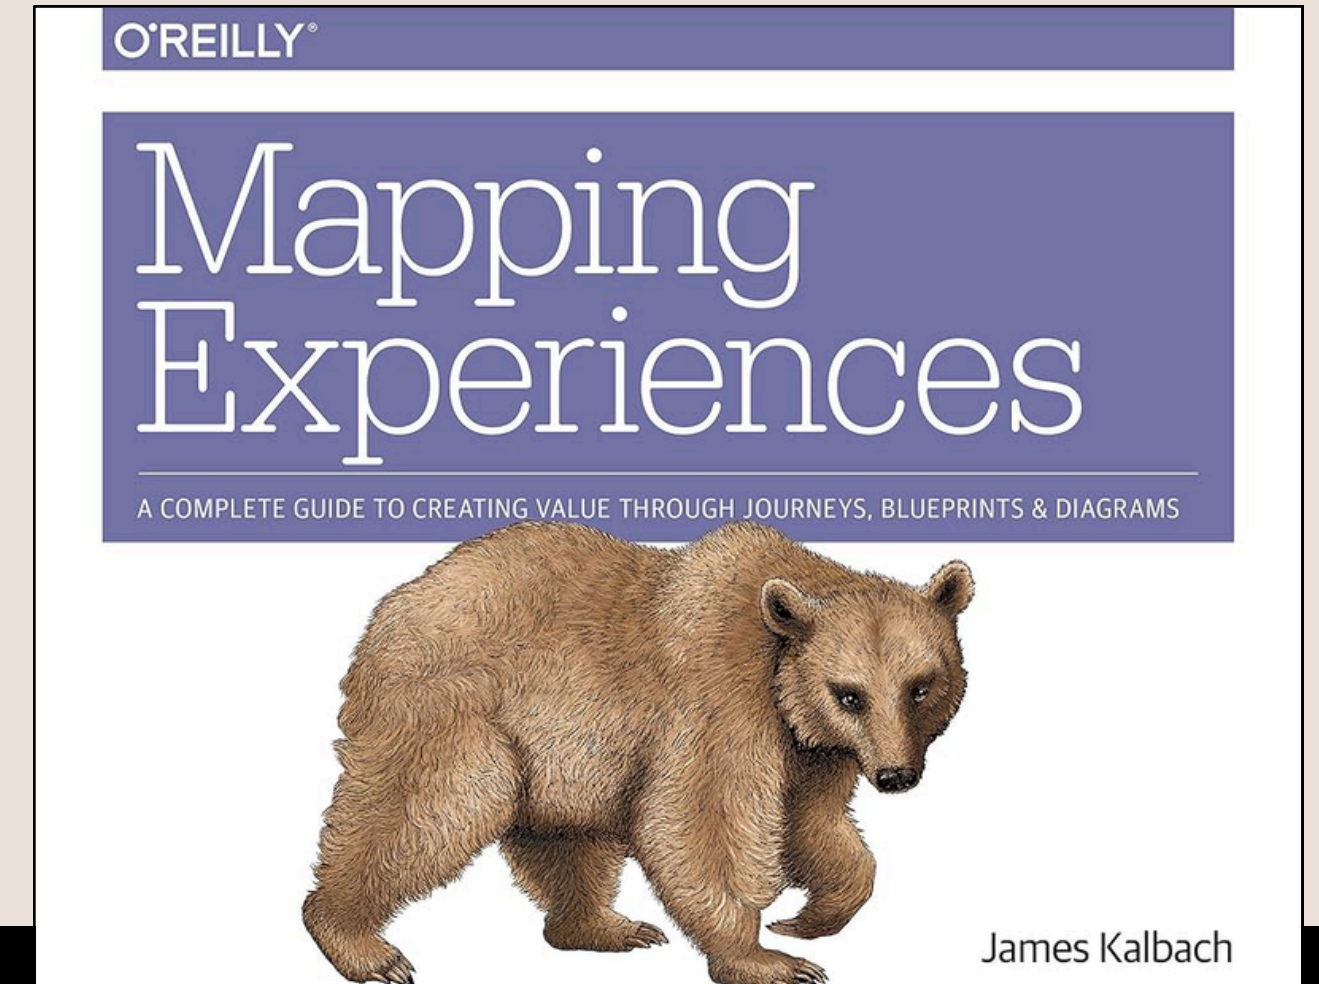

by need

comprehensive
guide to conducting
user research if
more resources

small, iterative, and
inexpensive
methods do user
testing

how to use tools
like journey maps
for insight and
action

soooo many
books out there

lots of opportunities
to find analog ways
to learn critical skills

+ try out a visual
hobby!

builds great “art of
noticing” skills
